

■ Flag's 2009 range

VAT for 1L or \$24.50 for 2.5L

Back in the conventional coatings world, **Flag Paints** has upgraded and simplified its range of marine paints for 2009. Flag Cruising Antifouling is copper based and self eroding, suitable for all displacement craft up to around 8kts.

Higher in active solids than comparable antifouling, it's available from leading chandlers from around \$29.95 inc VAT for 2.5L.

Flag Performance Extra is a 'semi-hard' antifouling offering top class protection for all craft in all waters and up to 35kts boat speed. Being made in Burnham-on-Crouch it's particularly suitable for high sediment rivers such as on the East Coast although equally good elsewhere.

Extremely high in active solids, it offers great value at \$69.95 inc VAT for 2.5L or \$17.75 for 450ml.

New to Flag this year is Multi-Purpose Metallic Primer, a universal base coat suitable for all below and above water applications on wood or metal offering good waterproofing and corrosion resistance. It also doubles well as a base or barrier coat between different antifouling. Extra value at \$10.75 inc
